SKILLS

Frontend Development | HTML ● CSS ● JavaScript ● React ● Redux ● Bootstrap ● Tailwind ● GSAP
Backend Development | NodeJS ● ExpressJS
Languages | JavaScript ● C ● Core Java ● Python
Database | MongoDB ● SQL ● MySQL
Tools | Rest API ● Git ● Postman

EXPERIENCE

WIPRO | Gurugram, Haryana
Scholar Trainee | November 2023 – September 2024
- Developed responsive, user-friendly web applications using React, HTML, CSS, and JavaScript.
- Improved usability by collaborating with UI/UX designers and conducting user testing.
- Streamlined front-end workflows using Bootstrap and Tailwind, reducing development time by 20%.
- Worked with backend developers to integrate REST APIs and ensure smooth functionality.

Scholar Trainee | July 2021 – October 2023
- Monitored and optimized network performance, ensuring high availability and efficiency.
- Maintained detailed technical documentation for audits and cross-team collaboration.
- Resolved network-related issues in collaboration with cross-functional teams.

EDUCATION

Vivekanand Institute Of Professional Studies (GGSIPU) | B.C.A. |
August 2018 – July 2021
GPA: 9.2/10
University Rank: 20

Vivekanand Public School (CBSE) | XIIth |
April 2017- Mar 2018
Percentage: 75%

Vivekanand Public School (CBSE) | XIIth |
April 2015- Mar 2016
Percentage: 9.2/10

CERTIFICATIONS

- Microsoft Certified: AZ-900
- Full Stack Web Development – Udemy
- JavaScript – HackerRank
- Java – HackerRank

PROJECTS

- **Travel Story App – [LINK]**
  Social media app for sharing travel experiences.
  Tech Stack: React, Node.js, Express, MongoDB, JWT
  - Users can post stories, like others' posts, and connect with travellers worldwide
  - Includes authentication, image uploads, and responsive UI
  - Designed using MERN stack with RESTful APIs and MongoDB for story storage

- **ImaGen – [LINK]**
  Text-to-image web app powered by image generation API
  Tech Stack: MERN, Clipdrop Api
  - Generates images from text using an external API
  - Implements a user credit system to limit generations using authentication system

- **Bright Access – [LINK]**
  Web accessibility testing tool for evaluating compliance with WCAG standards.
  Tech Stack: Node.js, Express, Puppeteer, axe-core, React
  - Built a client–server application to scan websites and HTML documents for accessibility issues.
  - Implemented automated detection of common problems like missing alt attributes, low color contrast, and keyboard navigation barriers.
